Projects

Food Delivery App / MERN Stack, Responsive Web Design

Apr 2024 - May 2024

- Developed a food delivery web application for a restaurant where users can search and categorize food items according to their preferences.
- Implemented features for selecting item quantities, adding items to the cart, and making orders.
- Utilized the full MERN stack for development: React for the front-end, Node.js for the backend, Express for server building, MongoDB for data storage and Bootstrap for styling and ensuring a responsive design.
